

200a 110/240v TIG WELDER SPECIFICATIONS

The TIG200PDC-DV is a 200 Amp DC (Steel) Dual Voltage (110/240v) TIG Welder complete with fully featured pulse welding, remote foot pedal option, HF arc starting and a high duty cycle

FULLY FEATURED PULSE WELDING
ADJUST FREQUENCY, WIDTH & AMPERAGE

WELDS STEELS
6-7mm

FEATURES & SPECIFICATIONS

- 5-200A TIG Output @ 60% Duty Cycle (240v)
- 5-140A TIG Output @ 60% Duty Cycle (110v)
- 5-180A MMA Output @ 60% Duty Cycle (240v)
- 5-120A MMA Output @ 60% Duty Cycle (110v)
- 110/240V Single Phase Input (Auto Switching)
- Full Featured Professional Pulse TIG welding Inc Frequency, Width and Amperage
- HF-Start
- Slope up 0 - 5 Seconds
- Slope down 0 - 5 Seconds
- Pulse Frequency range 0.5Hz - 25Hz
- Pulse Width 0.1 - 0.9 Seconds
- Pulse Amperage 5 - 200 amps
- Gas post flow 1 -10 Seconds
- 2T/4T Trigger Operation (trigger latching)
- Industrial quality metal chassis
- L.E.D Amperage Display (actual not preset)
- Remote foot pedal option for the ultimate weld pool control
- Cooling fan with thermostatic protection
- Nett Weight 18KG - Dimensions (mm) 425x195x310
- Generator Friendly - Generator must be minimum of 8KVA and fitted with AVR (auto voltage regulation)
- Package Includes, R-Tech TIG200DV TIG welder, 4m WP26 TIG torch, earth lead, MMA Lead, gas hose, mains cable, argon regulator, owners manual, torch consumables kit including tungsten's

2 Year Warranty
